Licenses and approvals are not assured in all jurisdictions

Krypterz Web3 Inc. (“Krypterz.com”) intends to operate in conformity with applicable laws and regulations and use its best efforts to obtain the necessary licenses and approvals. Regulatory licenses and/or approvals are likely to be required in several relevant jurisdictions where relevant activities may occur. This means that the development and roll-out of all the initiatives described in this whitepaper are not guaranteed. It is not possible to guarantee, and no person makes any representations, warranties, or assurances, that any such licenses or approvals will be obtained within a particular timeframe or at all. As such, the initiatives described in this whitepaper may not be available in certain jurisdictions, or at all. In addition, the development of any initiatives is intended to be implemented in stages. If these entities are no longer properly licensed in the relevant jurisdiction, this will impact the ability of Krypterz.com to rely on the services of that party.

No advice

This whitepaper does not constitute any investment advice, financial advice, trading advice, or recommendation by Krypterz.com, its affiliates, or its respective officers, directors, managers, employees, agents, advisors, or consultants on the merits of purchasing KPZ tokens nor should it be relied upon in connection with any other contract or purchasing decision.

Not a sale of a security

This whitepaper does not constitute a prospectus or financial service offering document and is not an offer to sell or solicitation of an offer to buy any security, investment products, regulated products, or financial instruments in any jurisdiction. KPZ tokens are not being structured or sold as securities on Krypterz.com. Owners of KPZ tokens are not entitled to any rights in Krypterz.com or any of its affiliates, including any equity, shares, units, royalties to capital, profit, returns, or income in Krypterz.com or any other company or intellectual property associated with Krypterz.com.

No representations

No representations or warranties have been made to the recipient of this whitepaper or its advisers as to the accuracy or completeness of the information, statements, opinions, or matters (express or implied) arising out of, contained in, or derived from this whitepaper or any omission from this document or of any other written or oral information or opinions provided now or in the future to any interested party or their advisers. The KPZ tokens, as envisaged in this whitepaper, are under development and are constantly updated, including but not limited to key governance and technical features. If and when the KPZ tokens are completed, they may differ significantly from the description set out in this whitepaper. No representation or warranty is given as to the achievement or reasonableness of any plans, future projections, or prospects and nothing in this document is or should be relied upon as a promise or representation as to the future. To the fullest extent possible, all liability for any loss or damage of whatsoever kind (whether foreseeable or not and whether or not Krypterz.com has been advised of the possibility of such loss or damage) which may arise from any person acting on any information and opinions contained in this whitepaper or any information which is made available in connection with any further inquiries, notwithstanding any negligence, default or lack of care, is disclaimed.

Third-party data

This whitepaper contains data and references obtained from third-party sources. The management believes that these data are accurate and reliable. However, they have not been subject to independent audit, verification, or analysis by any professional legal, accounting, engineering, or financial advisors. There is no assurance as to the accuracy, reliability, or completeness of the data.

Translations

This whitepaper and related materials are issued in English. Any translation is for reference purposes only and is not certified by any person. No assurance can be made as to the accuracy and completeness of any translations. If there is any inconsistency between a translation and the English version of this whitepaper, the English version shall prevail.

Restricted transmission

This whitepaper must not be taken or transmitted to any territory where distribution or distribution of this whitepaper is forbidden or restricted.

Views of Krypterz.com

The views and opinions expressed in this whitepaper are those of Krypterz.com and do not reflect the official policy or position of any government, quasi-government, authority, or public body (including but not limited to any regulatory body) in any jurisdiction. This whitepaper has not been reviewed by any regulatory authority.

Third-party references

Mentions in this whitepaper to specific companies, networks, and/or potential use cases are for illustrative purposes only. The use of any company and/ or platform names and trademarks does not imply any affiliation with, recommendation, or endorsement of/by, any of those parties.

All references to 'dollars', USD, or '\$' are references to the United States Dollars unless otherwise stated.

Graphics

All illustrations included in this whitepaper are for illustrative functions only. In particular, graphics with price references do not translate into actual valuing information.

Risk statements

Purchasing KPZ tokens involves substantial risk and may lead to a loss of a substantial or entire amount of the money involved. Before purchasing KPZ tokens, you should carefully assess and consider the risks, including those listed in any other documentation.

A purchaser should not purchase KPZ tokens for speculative or investment purposes. Purchasers should only purchase KPZ tokens if they fully understand the nature of the KPZ tokens and accept the risks inherent to the KPZ tokens.

Cryptographic tokens may be subject to expropriation and/or theft; hackers or other malicious groups or organizations may attempt to interfere with our system/network in various ways, including malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing, and spoofing which may result in the loss of your cryptographic tokens or the loss of your ability to access or control your cryptographic tokens. There may be no remedy in such an event, and holders of cryptographic tokens are not guaranteed any remedy, refund, or compensation.

It is possible that in the future, certain laws, regulations, policies, or rules relating to cryptographic tokens, digital assets, blockchain technology, or blockchain applications may be implemented which may directly or indirectly affect or restrict cryptographic token holders' right to acquire, own, hold, sell, convert, trade, or use cryptographic tokens.

The uncertainty in tax legislation relating to cryptographic tokens and digital assets may expose cryptographic token holders to tax consequences associated with the use or trading of cryptographic tokens.

Digital assets and related products and services carry significant risks. Potential purchasers should consider all of the above and assess the nature of, and their appetite for, relevant risks independently and consult their advisers before making any decisions.

Professional advice

You should consult a lawyer, accountant, tax professional, and/or other professional advisors before determining whether to purchase KPZ tokens.

Caution Regarding Forward-Looking Statements

This whitepaper includes certain forward-looking assertions regarding the business we conduct based on the faith of Krypterz.com and certain beliefs made by and information available to Krypterz.com. Forward-looking statements, by their nature, are topics of significant risks and uncertainties.

Forward-looking statements may involve estimates and assumptions and are subject to risks, uncertainties, and other factors beyond our control and prediction. Accordingly, these factors could cause actual results or outcomes that differ materially from those expressed in the forward-looking statements.

Executive Summary

Mission & Vision

At Krypterz.com, our vision is to increase the freedom of money in an environmentally friendly world. We believe that by spreading this freedom, we can significantly improve lives around the world. We also believe that everyone should have control over their money, data, and identity. We think that decentralization has the key to encouraging people around the world to better preserve their rights and that we are helping the world move in this direction by hastening the transition to embracing cryptocurrency.

Mission:

Accelerate the World's Transition to Clean Cryptocurrency

We believe that by accelerating the transition to adopting cryptocurrency, we can help people globally to:

- Control their money - ability to access their funds anytime and anywhere.
- Safeguard their data - cryptography-secured blockchain makes data-tempering highly unlikely.
- Protect their identity - no central entity can compromise your identity.

Vision:

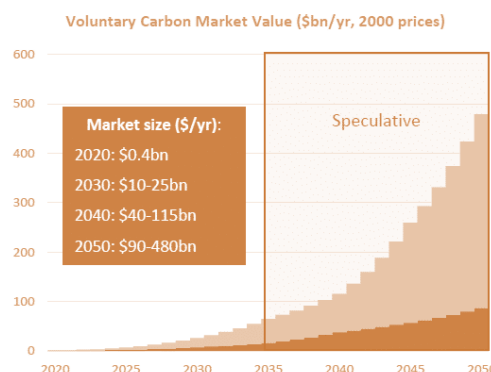

Environmentally Friendly Cryptocurrency in Every Wallet

In our journey to achieve this vision, we are:

Redefining how money is being moved, spent, and invested, and Democratizing blockchain technology by designing beautiful, simple, and useful financial services that have a lasting, positive impact on people's lives.

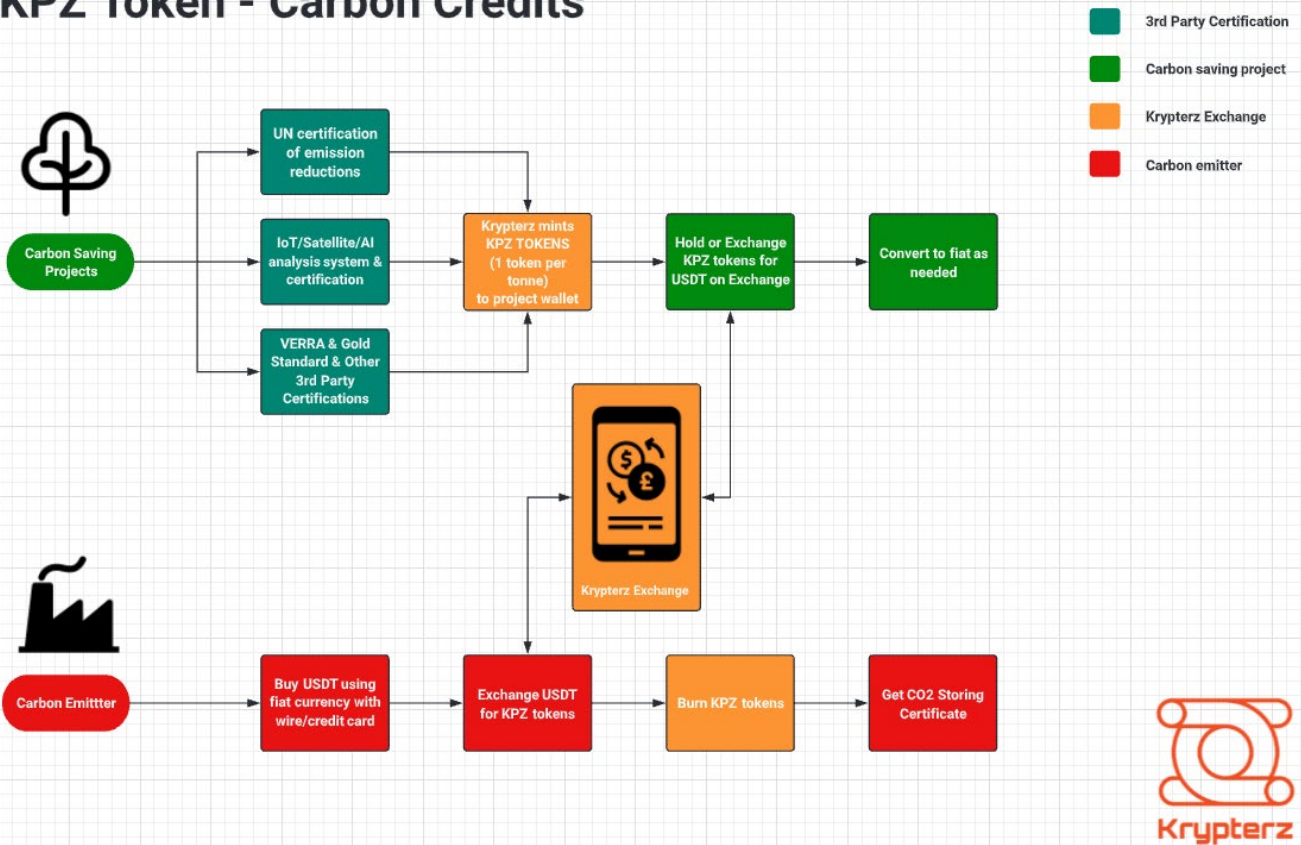

Carbon Offsets

Carbon offsets are a unit of measure, certifying that particular action, project, or thing has removed the equivalent of one metric ton of CO₂. One credit = one ton. As the voluntary carbon market value is exploding, we believe that the accountability of the current system needs to be revised and this is why we are introducing KPZ. One KPZ Token will be minted for each ton of CO₂ stored. We will be using a mix of existing certification bodies as well as implementing a satellite-based system to evaluate and monitor the CO₂ levels.

The tokens will be distributed via a digital wallet to certified CO₂ storing entities that they will be able to trade on the exchange when they see fit. On the opposite side, the CO₂ Emitters will be able to buy KPZ Tokens in the exchange for stable coins such as USDT obtained in exchange for fiat currencies.

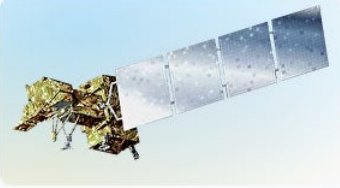

KPZ Token - Carbon Credits

CarbonSpace

The CarbonSpace platform is a remote and automated tool that doesn't require on-site measurements. You can monitor not only the project itself but the surrounding territory for controlling leakage effects. Nature-based carbon removal projects are an integral part of the global transition towards net-zero. However, their reputation has been tarnished due to a lack of transparency into their real performance, baselines set, and additionality achieved. Besides, current approaches to monitoring and verification are too costly, making small and medium-sized projects not viable economically.

This is where CarbonSpace enters the equation and provides a verifiable measurement of the baseline and the performance of the project.

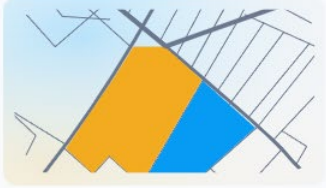

Collecting data

Gathering multispectral imagery and gas concentrations from the satellites.
Feature extraction and preparation for data assimilation.

Modelling emissions

Estimating global carbon fluxes using data assimilation with transport model.
Restoring hi-res carbon fluxes with the use of extracted features.

Providing estimations

Aggregating data and preparing the personal account.

UN certification of emission reductions

When you offset your emissions with Certified Emission Reduction units (CERs), you choose to take climate action through a process that is overseen by the United Nations. You purchase CERs that are issued from trustworthy climate-friendly projects called Clean Development Mechanism (CDM) projects. CDM projects take place in developing countries and contribute to their sustainable development. Each project goes through a strict and thorough vetting process.

The CDM process involves a variety of stakeholders such as the project participants who own the projects, host-country national authorities who oversee national implementation, independent auditors known as the Designated Operational Entities, the UNFCCC CDM Executive Board, and its secretariat. At a higher level, all CDM work is coordinated and directed by the UNFCCC Conference of the Parties to the Kyoto Protocol (CMP), the ultimate body responsible for the implementation of the Kyoto Protocol where all member states take collective decisions.

Certification process

- 1. Project design**
The project participant prepares a project design document, making use of an approved emissions baseline and monitoring methodology.
- 2. National approval**
Host-country Designated National Authority for CDM approves the project and its contribution to national sustainable development.
- 3. Validation**
Designated Operational Entity, an accredited, third-party auditor, validates the project design.
- 4. Registration**
CDM Executive Board assesses the validated project for registration.
- 5. Monitoring**
The project participant monitors the actual emissions according to the approved methodology.
- 6. Verification**
Designated Operational Entity verifies that emission reductions took place, in the amount claimed, according to the approved monitoring plan.
- 7. CER Issuance**
CDM Executive Board assesses the verified achieved emission reductions for issuance of CERs
- 8. Offsetting**
Company or individual pays for the cancellation of CERs to compensate for their emissions. The project generates revenue to operate.

The offsets issued from the CDM are recorded and tracked in the Kyoto Protocol's registry system. This is an elaborate electronic network of registry databases that meticulously accounts for each offset. The UN carbon offset platform is fully integrated with the CDM registry which issues all CERs.

Sustainable development co-benefits of the projects

The CDM records information about the non-mitigation benefits of the projects, which are commonly referred to as sustainable development (SD) co-benefits. The projects voluntarily report their co-benefits in three categories: environmental, social, and economic.

Environmental co-benefits include:

- Air: Improved air quality
- Land: Improved soil quality or avoided pollution

- Water: Improved water quality or access
- Natural resources: Depletable natural resources protection or enhancement

Social co-benefits include:

- Education: Education, research, awareness-raising, or distribution of information
- Health and safety: Improved health and safety- Jobs: Job or income generation
- Welfare: Improved social welfare (community upliftment)

Economic co-benefits include:

- Energy: Improved energy availability or access
- Growth: Support for economic development or stability
- Balance of payments: Improvement of the country's trade balance
- Technology: Technology transfer or diffusion

Future of the Internet: Web3

Krypterz.com is committed to building the future of the internet in an environmentally friendly manner using Web3 technologies. Powered by cryptocurrency, Web3 will be fairer and more equitable, owned by the builders, creators, and users. We build day by day, block by block, to give everyone control over their money, data, and identity. The journey to building Web3 will be long and hard, but we will all look back at this moment and know “it was all worth it”.

Problem Statement and Our Strategy

Key Challenges in Driving Crypto Adoption

We see the following key challenges in driving crypto adoption:

User Experience	Inadequately designed user experience does not pleasure or fulfill users
Value Proposition	Weak value propositions do not incentivize people to use crypto for purposes other than speculative trading
Complexity	Difficult to understand and invest for new-to-crypto users
Security	Damaged user confidence from crypto-related fraud and theft

Our Strategy

To tackle the challenges above, we are offering products along four verticals:

1. Payment
2. Trading
3. Environmental Services
4. Education

Our strategy is to leverage payment solutions as the primary tool for driving adoption and user acquisition while building trading and environmental services solutions as the major sources of revenue. Our education platform is a value-added service that enables users to learn about cryptocurrencies and how to use them. This approach creates and self-sustains a worthy cycle: payment channels bring users onto the platform, whereas exchange and environmental facilities generate income that can be reinvested into payment and used to build the environment to offer full-suite cryptocurrencies services.

Our product solutions across four verticals are building up a sustainable ecosystem that serves our mission: Accelerate the World's Transition to Cryptocurrency in an environmentally friendly manner.

Commitment to Security & Compliance

Building trust is the cornerstone of our commitment to our customers - we believe that security and compliance are the foundations of achieving mainstream cryptocurrency adoption.

Krypterz.com will be aiming to get the following certifications:

- SOC 2 Compliance
- ISO/IEC 27001:2013
- ISO/IEC 27701:2019
- ISO 22301:2019
- PCI: DSS 3.2.1 Level 1 compliance

SOC (Service Organization Control) 2 certification is a common standard in the traditional financial industry, which affirms that information security practices, policies, procedures, and operations meet the SOC 2 standards for security, availability, confidentiality, and privacy.

ISO/IEC 27701:2019 Certification is the "Gold Standard" for privacy risk management.

ISO/IEC 27001:2013 Certification is the "Gold Standard" for information security management.

ISO 22301:2019 Certification is the internationally recognized standard for Business Continuity Management (BCM).

PCI: DSS (Payment Card Industry: Data Security Standard) outlines a set of strict requirements set by the payment card industry and is designed to ensure that organizations that process, store, or transmit credit card data maintain a highly secure environment and uphold the highest data security and privacy standards. Level 1 is the highest level of certification.

We plan on completing a detailed security assessment, which will include external penetration testing, and threat modeling through to risk control reviews.

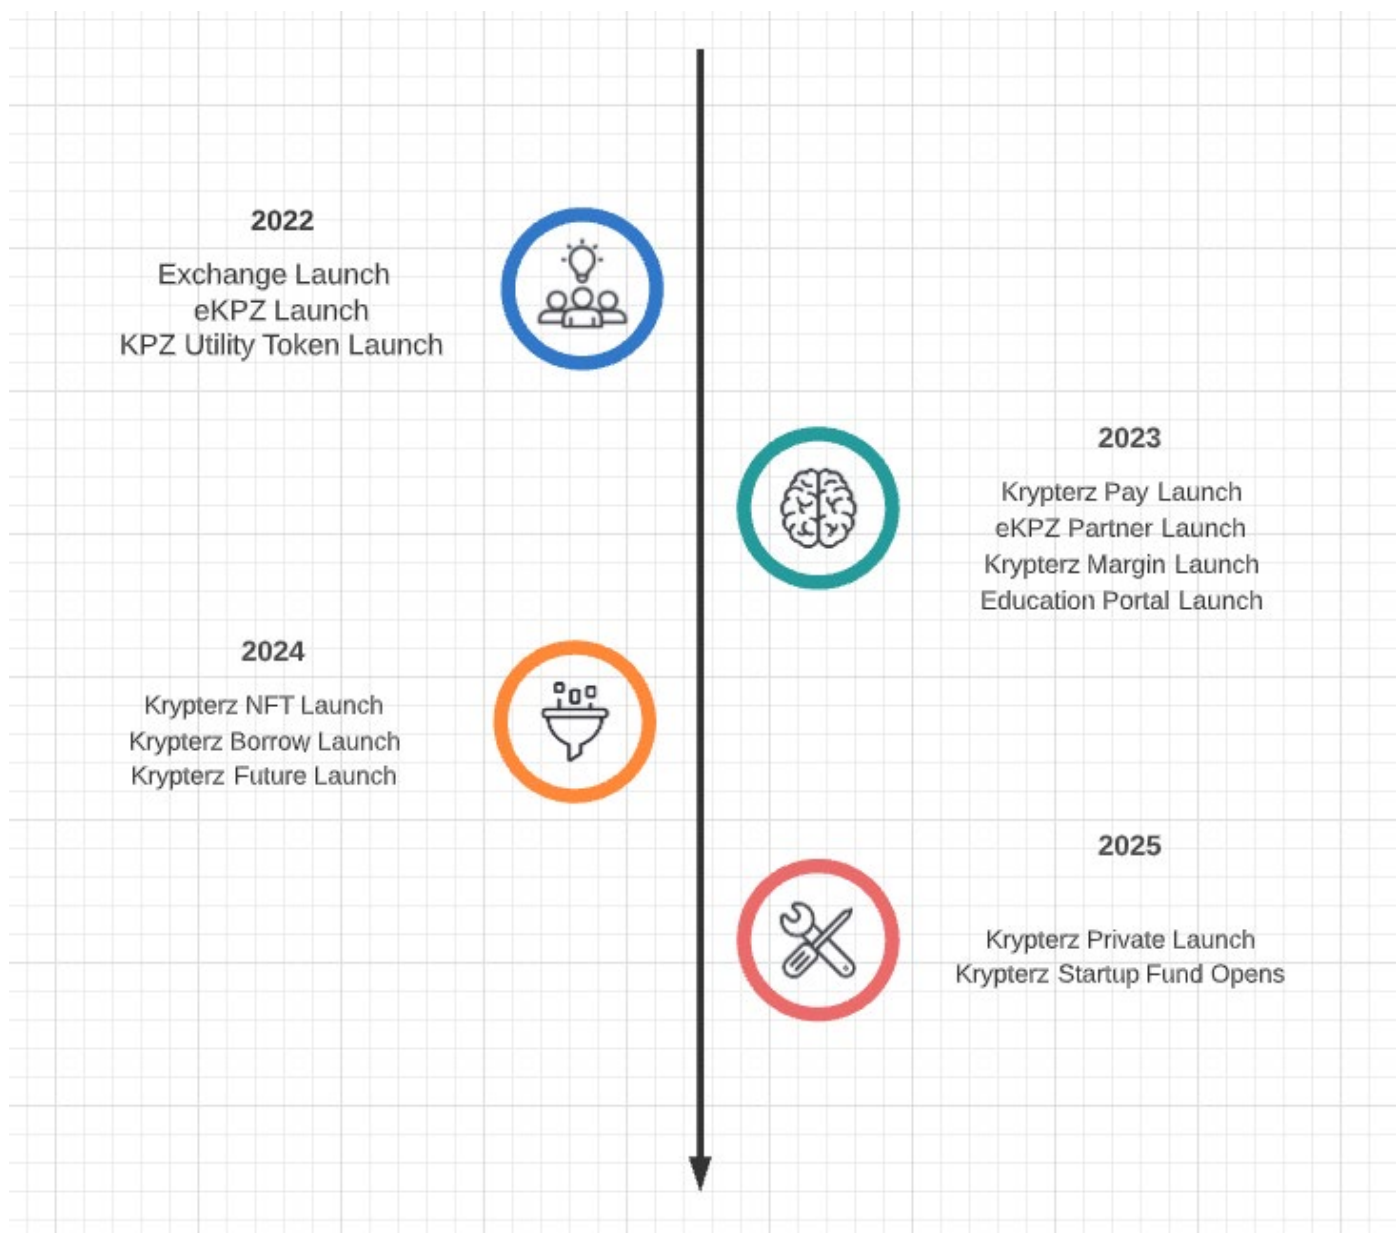

All users' cryptocurrencies are held offline in cold storage. Krypterz.com will secure cold storage insurance against physical damage or destruction and third-party theft.

Krypterz.com Solutions Overview

Below is an overview of the products we offer along four verticals:

- **Payment** - Krypterz.com Pay
- **Trading** - Krypterz.com App, Krypterz.com Exchange
- **Environmental Services** – KPZ Token
- **Education** – Crypto education portal

We are planning on achieving the following milestones by 2025:

Krypterz.com Solutions - Payment

Value Proposition

Krypterz.com Pay is a mobile payment service that lets you pay in and/or receive cryptocurrency anywhere, anytime for free. Krypterz.com Pay delivers the following value propositions:

- Low fees. Merchants pay minimal fees for settlements in crypto or fiat, saving up to 80% on fees versus typical payment processors;
- Low volatility & low risk offered by letting merchants accept cryptocurrency and get paid in their preferred crypto or fiat currency;
- Easy to set up, view, and manage payments in a matter of minutes;

User Experience

Pay Checkout lets customers check out and pay in crypto and/or merchants to receive crypto as a payment option. It delivers the following benefits for merchants and customers:

- Pay Checkout is easy and intuitive to use for merchants and customers.
- The customer pays in crypto by choosing “Krypterz.com Pay” on the checkout page at the merchants.
- The customer is presented with a QR code and scans to pay – either with Krypterz.com App or with a supported decentralized wallet.
- The customer’s account is debited.
- The merchant receives payment instantly in fiat currency or cryptocurrency of their choice in their business account with Krypterz.com.

On one hand, the customer experience is designed to be effortless, and each payment can be completed with a few taps on their mobile phone. Our team is working to expand the list of merchants that integrate with Krypterz.com Pay, with our selected partners.

Pay Gift Cards

With Pay Gift Cards, Krypterz.com App users will be able to shop at worldwide prominent brands with crypto and get cash back with each purchase. We will offer gift cards from brands in different categories including airlines, hotels, games, fashion, food and beverage, general retail, telecommunication, gas and diesel, entertainment, taxi services, and grocery. Users will be able to find renowned brands such as iTunes, Google Play, Amazon, Starbucks, Nike, etc. with more brands around the world being added to the catalog continuously.

Pay Airtime Top-Up

Pay Airtime is a feature that will enable Krypterz.com App users to pay for mobile airtime top-up via Krypterz.com Pay in cryptocurrencies such as BTC, ETH, LTC, and KPZ.

With a few clicks in the Krypterz.com App, users will be able to top up airtime for mobile numbers offered by over 400 prepaid mobile network operators, including T-Mobile, Vodafone, Airtel, Orange, and Verizon & others, in over 100 countries. Users will also have the option to top up their mobile phone or for others, anytime and anywhere.

Pay Your Friends

Pay Your Friends will allow users to pay back their friends in crypto and earn rewards by doing so. Users will be able to pay their friends in any cryptocurrency for free. Alternatively, if a user pays friends back in our home crypto tokens, the sender will be rewarded with up to 10% cashback on this transaction.

What we want to achieve with Pay Your Friends is to give our users a reason to bring all their friends into cryptocurrency. The user experience is instantaneous & free - the more users get a chance to experience it, the closer we get to global adoption.

Krypterz.com Solutions - Trading

Krypterz.com App

Value Proposition

Krypterz.com App delivers the following value propositions:

- One-stop shop to buy, sell, store, send & track cryptocurrency securely and conveniently with a few taps on their mobile phones;
- The only place to buy crypto at true cost - Krypterz.com's increasing coverage of fiat top-up channels and convenient app interface, this makes Krypterz.com App the best place to buy crypto.

User Experience

Buy & Sell Crypto

Users can buy crypto with their fiat wallets and/ or with a credit or debit card. The Krypterz.com App will support 20+ fiat and 200+ cryptocurrencies.

Send Crypto

Users can send crypto to Krypterz.com App users instantly without fees or withdraw crypto to external wallet addresses with minimal fixed fees.

Track Crypto

Users can monitor 200+ coins at their fingertips in the coin tracking tab. Metrics available include prices, volume, market cap, % change, and more that are refreshed frequently and up to date. The app also presents charts in dual currencies (USD, BTC) and different time frames (1m, 5m, 15m, 1H, 4H, 1D, 1W).

Krypterz.com Exchange

Value Proposition

Krypterz.com Exchange lets users trade crypto at ease with the following value propositions:

- Deep liquidity at attractive fees, with discounts available for users who stake our home currency;
- Comprehensive product offerings including spot trading, the margin will be available

User Experience

Spot Trading

Retail & corporate users can trade on the exchange via the web interface or via the exchange API. Krypterz.com Exchange supports trading pairs for cryptocurrencies with leading market capitalization and volume such as BTC, ETH, LTC, USDT, and more, as well as KPZ token - the native currency of Krypterz.com.

The fees on the exchange are based on trading volume. The higher the volume, the lower the trading fees. In addition, users enjoy trading fee discounts if they pay the fees in our home currency.

Margin Trading

Margin trading on the Krypterz.com Exchange will allow you to borrow cryptocurrencies on Krypterz.com Exchange to trade on the spot market. Eligible users can use the margin loan as leverage to open a position that is larger than the balance of their account.

Derivatives Trading

The first derivatives product offered on Krypterz.com Exchange will be perpetual. Perpetuals enable traders to buy or sell the value of their 'assets', whereby the underlying asset itself is never traded—allowing them to better manage risk. Perpetuals do not expire or have a settlement date, and users can hold their positions for as long as needed.

Krypterz.com Lending

Krypterz.com Lending allows you to borrow against your cryptocurrencies without selling them. You can deposit them as collateral and take out crypto loans to fulfill your financial needs, used them for Margin Trading on the Krypterz.com Exchange, or hedge on other exchange platforms.

If you are an institutional user and require more flexible loan terms, you can apply for Lending Pro on Krypterz.com Lending. Once your application has been approved, you can enjoy a higher borrowing limit and apply for loans with customized terms when they are available.

Syndicate

The Syndicate is a discounted token offering platform on Krypterz.com Exchange.

The Syndicate helps projects raise awareness and drive user education. The listing project can provide an allocation of their token for distribution on the Krypterz.com Exchange to users with up to a 50% discount. All proceeds from the sale are passed back to the projects. Home currency holders receive priority token allocation for these events.

Staking Benefits

Krypterz.com Exchange users can enjoy benefits provided by two types of staking services:

- **KPZ stake-and-earn:**
Users can stake KPZ for 180 days on the Exchange and earn up to 10% in interest annually.
- **Soft staking for idle balance:**
Krypterz.com Soft Staking offers users a new way to earn rewards of up to 4% in interest annually on cryptocurrencies held in the Exchange. Rewards are offered on a flexible term - no "lock-up" is required. The soft-staking maximum limit varies depending on the currency, and users with more KPZ staked on the Exchange are eligible for higher limits.

Other Features & Promotions

Krypterz.com Exchange will continuously expand its product offerings for retail & institutional users.

Krypterz.com Solutions – Environmental Services

Decentralized Environmental Services

Our flagship product for our environmental services will be our eKPZ token. The eKPZ will allow for environmental projects to be evaluated and certified for CO2 storage using existing standard bodies and our revolutionary satellite-based evaluation and certification system. They will then get an equal amount of eKPZ for each ton of CO2 sequestered by their project. There will only be one and only one eKPZ minted for each ton of CO2 sequestered.

The CO2 Emitters will then be able to buy these eKPZ on our exchange to redeem in exchange for their carbon credits certificate. An eKPZ token bought by an emitter is always equal to a ton of CO2 sequestered as every time an emitter exchange his eKPZ tokens, they are burned and taken out of circulation.

Value Proposition

eKPZ will be a Binance Chain (BSC) deflationary token with a circulation of 2 100 000 000 tokens. KPZ is deflationary with a transaction tax of 1%, a burning fee of 98%, a holder reward fee of 1%. This will allow for the token to increase in value and reward token holders.

Its value proposition is as follows:

- Binance Chain (BSC) Compatibility: eKPZ is built on the BSC chain, which supports rapid porting of apps & smart contracts from the BSC chain.
- Binance Smart Chain achieves ~3 second block times with a Proof-of-Stake consensus algorithm. In particular, it uses something called Proof of Staked Authority (or PoSA), where members stake BNB to develop into validators.
- Open Source: Welcoming high involvement of the community is welcomed to proactively review and provide suggestions to strengthen eKPZ.
- Binance Smart Chain (BSC) is best defined as a blockchain that operates in parallel to the Binance Chain. Nothing like Binance Chain, BSC features smart contract functionality and compatibility along with the Ethereum Virtual Machine (EVM).
- BSC is EVM-friendly, it began with support for the rich world of Ethereum tools and DApps. In principle, this makes it easy for creators to port their ventures over from Ethereum. For consumers, it means that products like MetaMask can be effortlessly designed to work with BSC.
- The token launched on August 18th, 2022.

Technology

Please refer to below the documents for more information & useful tools about KPZ:

KPZ Website: <https://www.krypterz.com/krypterz-coin-kpz/>

Trade KPZ: <https://exchange.krypterz.com/>

Token Creation and Basic Information

In August 2022, Krypterz.com will launch the “Carbon Credits” token (eKPZ), the carbon credit token of Krypterz.com on the BSC Chain. The new name properly reflects the decentralized nature of eKPZ and recognizes the explosive growth of the eKPZ ecosystem. The eKPZ ecosystem represents the next major phase in the adoption and utilization of Web3 by hundreds of millions of users.

Token Distribution and Planned Use

Krypterz.com has pledged to burn 98% of eKPZ on every transaction.

Krypterz.com Solutions - Education

Krypterz.com Education Portal

Value Proposition

- Krypterz.com educational portal is a platform dedicated to delivering unique content about cryptocurrencies.
- Open a platform, that all users can become a creator;
- User-friendly experience, allowing users to take courses for free;

User Experience

- User login using their Krypterz account
- The can view video-based courses on both cryptocurrencies and the environment

Krypterz.com Solutions - Other Services & Benefits

Krypterz.com Private

Krypterz.com Private is a package of premium rewards and benefits tailored for our VIP members. This builds on our existing benefits for these members.

Benefits for All Private Members

All Krypterz.com Private Members will have access to a set of crypto-related services:

- OTC block trades of KPZ
- Priority access to research reports published by Krypterz.com Inheritance service i.e., assistance with estate handling related to Krypterz.com assets
- Top industry events access
- Priority customer service

Referral Program

Krypterz.com App Referral Program

Our referral program provides some of the richest rewards ever seen in the industry. Both referrers and their referred friend receive a \$50 bonus (in KPZ) with each successful sign-up and KPZ staking.

All eligible Krypterz.com App users can participate in the referral program, with no limits on the number of referrals. Bonuses of the referral program are credited instantly, and your referred friends can use their sign-up bonus immediately after they make a valid transaction.

Krypterz.com Exchange Referral Program

The Krypterz.com Exchange referral program offers rewards to both eligible new referred users and the referrers. New users that pass verification and stake a certain amount of KPZ are eligible to receive up to USD\$50 equivalent in KPZ. Eligible referrers can receive up to US\$2,000 equivalent in KPZ and 50% of the referee's NET trading fees (after all staking and trading volume discounts are applied) for a 12-month trading fee commission.

Krypterz.com Partnerships and Investments

Global Brand Campaign

In September 2022, Krypterz.com will roll out a global ad campaign to formally introduce the platform to consumers around the world. Krypterz.com is committed to building the future of the internet: Web3. Powered by cryptocurrency, Web3 will be fairer and more equitable, owned by the builders, creators, and users.

Strategic Partnerships

Krypterz.com will develop a world-class strategic partnership portfolio to foster collaboration. Krypterz.com will eventually act as an NFT partner for brands to allow them to launch their NFTs. In early 2023, Krypterz.com will launch Krypterz.com NFT, the premier platform for collecting and exchanging NFTs.

Climate Commitment

Krypterz.com has a goal of becoming carbon negative in 2023. We commit to offsetting more carbon than is generated by all activities related to the organization through a multi-phased approach:

- First Phase - Assessment of the carbon generated through cryptocurrency trading, deposit, and withdrawal activities on all of Krypterz.com's platforms;
- Second phase - Identifying the most effective ways to offset the carbon generated, with the support of accredited organizations specializing in carbon offsetting and sequestration;
- The Third phase - Focusing on carbon generated through all of the business activities conducted by Krypterz.com which fall outside of trading

Krypterz.com targets building a Krypterz.com Ecosystem that offers the industry a path towards clean and enviro-friendly crypto.

Krypterz.com Capital

Krypterz.com Capital will be the venture capital arm of Krypterz.com. We will build a fund aiming to accelerate the growth of early-stage crypto startups by leading Seed and Series A rounds.

The operating principle of Krypterz.com Capital is 'Founders First'. As entrepreneurs, Krypterz.com Capital understands how hard it is to bring game-changing ideas to life. Founders can count on Krypterz.com Capital to move fast and provide the most valuable assets when new business needs arise.

The company invests in long-term partnerships with entrepreneurs in every sector of the industry to advance it together. With Krypterz.com Capital, startups choose a reputable lead investor with a strong portfolio and priority of launch on the world's fastest-growing crypto platform.

Krypterz.com Solutions – KPZ Utility Token

Value Proposition

KPZ is a Binance Chain (BSC) deflationary token with a circulation of 2 100 000 000 tokens. KPZ is deflationary with a transaction tax of 1%, a burning fee of 1%, a holder reward fee of 1%, and a buyback fee of 1%. This will allow for the token to increase in value and reward token holders.

Its value proposition is as follows:

- **Binance Chain (BSC) Compatibility:** KPZ is built on the BSC chain, which supports rapid porting of apps & smart contracts from the BSC chain.
- **Binance Smart Chain achieves ~3 second block times** with a Proof-of-Stake consensus algorithm. In particular, it uses something called Proof of Staked Authority (or PoSA), where members stake BNB to develop into validators.
- **Open Source:** Welcoming high involvement of the community is welcomed to proactively review and provide suggestions to strengthen KPZ.
- **Binance Smart Chain (BSC) is best defined as a blockchain that operates in parallel to the Binance Chain.** Nothing like Binance Chain, BSC features smart contract functionality and compatibility along with the Ethereum Virtual Machine (EVM).
- **BSC is EVM-friendly,** it began with support for the rich world of Ethereum tools and DApps. In principle, this makes it easy for creators to port their ventures over from Ethereum. For consumers, it means that products like MetaMask can be effortlessly designed to work with BSC.
- **The token launched on August 18th, 2022.**

Token Creation and Basic Information

In August 2022, Krypterz.com will launch the “Krypterz.com Coin” (KPZ), the utility token of Krypterz.com on the BSC Chain. The new name properly reflects the decentralized nature of KPZ and recognizes the explosive growth of the KPZ ecosystem. The KPZ ecosystem represents the next major phase in the adoption and utilization of Web3 by hundreds of millions of users.

Token Distribution and Planned Use

Krypterz.com has pledged to burn 1% of KPZ on every transaction.

Token Utility

The Krypterz (KPZ) token is the utility token of Krypterz.com. KPZ also powers the overall Krypterz.com ecosystem, with utility payment, trading and financial services use cases.

Token name	Krypterz	Current Token Holding	Burned %
